New Machines & More: We Pay a Visit to Kärcher

Facility and service managers from Dinslaken, Düsseldorf, Chemnitz and Erfurt refresh their knowledge of Kärcher cleaning machines and get to know new products.

First-rate equipment lightens the load of hard physical cleaning work and helps us to provide our services speedily and well. That's why our colleagues from the Dinslaken and Düsseldorf Süd, and the Erfurt and Chemnitz branches paid a visit to their local Kärcher partners.

It was a fantastic day for both groups. There was a machine presentation, and the facility and service managers had the opportunity to learn about the latest developments. The demonstration of Kira, a cleaning robot, was of particular interest to the people from Erfurt and Chemnitz. The managers from Düsseldorf Süd and Dinslaken also made the most of their visit to get to know the company and their local partners better.

"Kärcher gave us a warm welcome. We also held our service manager

meeting there – over coffee and cake, of course. "Martin Keller of Kärcher and Key Account Manager Nino Mrzlecki also joined us," says André Dölken, Regional Manager of West II and Managing Director of Servico FM.

"It was super being able to refresh and expand our knowledge," Jens Skarabis of Erfurt and Chemnitz adds. „Our suppliers' experts appreciate it particularly when we bring them in at an early stage. They know their equipment best and help us by giving us the benefit of their specialist knowledge to achieve the best possible cleaning result."

Employee Award

Bülent Yildiz is Employee of the Month in Hamburg

Our employees do a great job day after day. That's why we want to thank them and show our appreciation to the people who give top performance for Vebego.

One such employee is Bülent Yildiz. He works in the mat service department of our Hamburg Nord branch and has now been named Employee of the Month for his amazing support while standing in for another staff member and for always being an excellent team member. The award was presented to Yildiz by Marlena Petersen, Hamburg Branch Manager, and Sascha Eisenberg, Technical Manager.

Duck Race in Dinslaken

Ducks Swim for a Good Cause

The staff at our administrative centre in Dinslaken took part in the notoriously whacky duck race in Dinslaken at the end of April. The management of our administrative centre in Dinslaken procured racing ducks with personalised starting numbers for all of their employees. The ducks could be purchased for the sum of five euros. The proceeds of the duck sale go to support the social projects Dinslakener Tafel, a food bank, and Wunderfinder, a local charitable organisation that helps people in challenging circumstances.

Along with some 7000 other ducks, our Vebego ducks raced down the 2.3-kilometer stretch of the Rotbach river with hundreds of people following the spectacular contest from the nearby riverbank.

By the Way

Production of New Workwear Begun

The production of our new Vebego-style workwear is in full swing. According to Buddy Workwear, our manufacturer, the first delivery of dyed work clothes arrived for our cleaning staff from the factory in Portugal at the end of May. Our first branches will be taking delivery of their orders in early June.

The new work clothes will be rolled out to all of our staff in Germany successively, facility by facility, over a longer period. The changeover to the new workwear in Vebego design is due to be completed by the end of 2024.

The staff of our security services, industrial cleaning, landscaping and technical service departments can also look forward to new workwear sporting the Vebego logo. The security services will not be switching to Vebego purple, however, but staying with the familiar dark blue. Production has also already begun on their new work clothes.
